***Response to Arguments***

The applicant's amendment filed 8-12-04 overcomes the examiner's prior art rejection and claims 1-5, 36-58, 63-64, 67-87 are allowed. Claims 6-21, 59-62, 88-93 and 95 were cancelled.

***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance:

1. Independent claim 1 includes subject matter of objected claim 94:

-- when a determination is made that an inter-frequency handover should be performed, the user equipment unit can switch to the virtual active set of plural base station without making measurements respecting the signals on the second frequency after the determination and before using the virtual active set of plural base stations as a new active set.

2. Independent claim 36 includes subject matter of objected claim 96.

-- when a determination is made that an inter-frequency handover should be performed, switching to the virtual active set of plural base stations without making measurements respecting the signals on the second frequency after determination and before using the virtual active set of plural base stations as a new active set.

3. Independent claim 41 includes subject matter of objected claim 97.

-- when a determination is made that an interfrequency handover should be performed, switching to the virtual active set of plural base stations without making measurements respecting the signals the second frequency after the determination and before using the virtual active set of plural base stations as a new active set.

4. Independent claim 67 includes subject matter of objected claim 98.

-- wherein the virtual active set being essentially utilized involves the user equipment unit switching to the virtual active set of plural base stations without making measurements respecting the signals on the second frequency after a determination that an inter-frequency handover should be performed and before using the virtual active set of plural base stations as a new active set.
